

# MEDIMIX

FARM MEDICATION MIXERS

Consistent doses.  
Reduced waste.  
Healthy livestock.

15 GAL MIXER

30 GAL MIXER

The Medimix is a water-soluble farm medication mixer, designed to keep your medicated water evenly and consistently mixed. Its unique design combines an easy to use timer which activates a mixing motor at timed intervals - keeping your solution thoroughly mixed throughout the day. The large lid makes adding medication quick and easy. A valve on top allows direct connection to the water supply while the medication tube provides access for the medicator line. A valve on the bottom allows for quick drainage. The large, easy to read volume decal enables you to precisely measure liquid. Available in a 15 or 30-gallon tank, the Medimix will meet all your water-soluble medicating needs.

## THE MEDIMIX ADVANTAGE

Medicating livestock via water-soluble medication should be easy. Medicators are designed to dose out medication with very little effort by the farmer, yet the medication dosed is often sludgy and inconsistently mixed. The Medimix automates what once was a tedious task.

Simply add water and medication, and the Medimix will keep your solution consistently mixed to maximize your medication investment. Why waste product when you can make water-soluble medicating care-free?

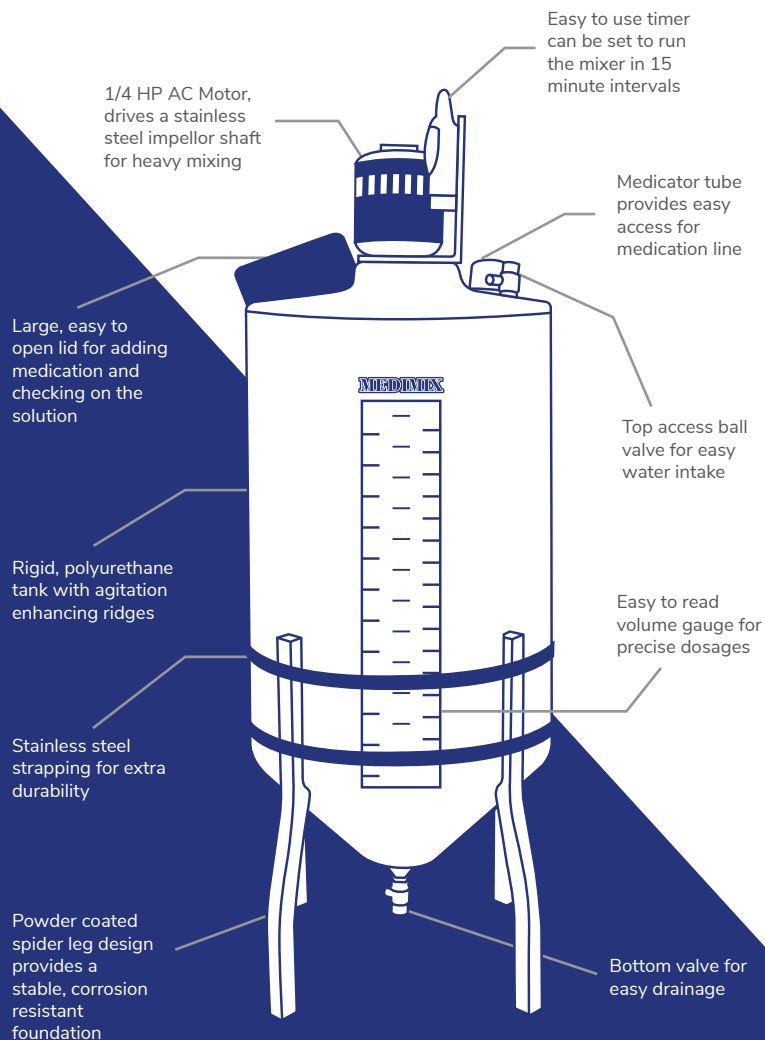

The Medimix is effective for all farms that require water-soluble medication solutions: hogs, chickens, turkey, beef and dairy. Get consistent doses, reduce waste and keep your livestock healthy with Medimix.

## KEY BENEFITS

- Keep your medications evenly mixed 24 hours/day
- Reduce medication wastage
- Get full value out of your medication investment

## FEATURES

- Durable, corrosion-proof tank
- Easy to read volume gauge
- Highly corrosion-resistant mixing device helps prevent sludge build-up in your Medicator
- Keeps flow of medication to your livestock smooth and even
- Capacity: 15 and 30 gallons

A 1/4 HP motor drives the stainless steel impellor shaft for heavy mixing. A timer is included to regulate mixing in an easy to use interface, ensuring your medications don't settle and dosages stay consistent.

## TECHNICAL SPECIFICATIONS

Capacity	Width	Height	Shipping Dims	Weight
15 gal	24"	49.5"	24" x 24" x 49.5"	49 lb
30 gal	24"	55"	24" x 24" x 55"	52 lb

### Motor

- 1/4 HP AC Motor
- 1725 RPM
- 115 V - 1 PH - 5.0 A
- CSA and UL Certified

### Timer

- Easy to use Timer (set the mixer to run in 15 minute intervals)
- Manual Override Switch
- CSA and UL Certified
